Can a 1000W solar panel charge an electric car?

As electric cars don't usually need to be charged every day, if your 1000w solar panel system is accompanied by a set of solar cells, the 1000w solar panel system can store enough power for a single charge of a domestic electric car in between charging the car.

Can a 300 watt solar panel charge a 12 volt battery?

A 300-watt panel can generate approximately 25 amps of power per hour under ideal sunlight conditions, making it suitable for charging larger 12-volt batteries like those used in RVs, boats, or off-grid systems. However, you'll need a solar charge controller (preferably MPPT) to regulate the voltage and prevent overcharging.
