Available in both 100kWh and 215kWh capacities, this modular system integrates power modules, batteries, cooling, fire protection, and environment monitoring in a compact outdoor cabinet.

Featuring lithium-ion batteries, integrated thermal management, and smart BMS technology, these cabinets are perfect for grid-tied, off-grid, and microgrid applications.

The 5MWh container energy storage system is a super cool solution that seamlessly combines different parts, like a Lithium iron phosphate battery, Battery Management System, Gaseous Fire Suppression ...

Housed in a weatherproof outdoor cabinet, this compact system offers easy installation and reliable operation. It is ideal for small-scale microgrid applications such as villages, telecom stations, and ...

Our Battery Energy Storage System (BESS) can be operated under on-grid and Off-grid operation mode. The BESS system is controlled to cut off the grid connection within 10 seconds and switch to ...

It supports black-start operation, peak shaving, load shifting, and microgrid integration, making it ideal for large factories, data centers, renewable integration, and backup applications.

100kW/215kWh LFP energy storage system, and a generator set. The hybrid energy storage system adopts integrated design, the battery and the MPS series hybrid inverter, which contains PCS ...

Perfect solution for remote, indigenous, and isolated communities as well as disadvantaged community microgrid and nanogrid projects. Drop-in, pre-packaged and easy to implement at low cost with ...
