Do I loose anything by stepping down the voltage before the inverter? I could return the 12V inverter and get a 60V version, but is it worth the bother or should I just step down the battery ...

To calculate the battery capacity for your inverter use this formula
$$\text{Inverter capacity (W)} \times \text{Runtime (hrs)} / \text{solar system voltage} = \text{Battery Size} \times 1.15$$

Multiply the result by 2 for lead-acid type battery, for lithium battery type it would stay the same
Example Let's suppose you have a 3000-watt inverter with an 85% efficiency rate and your daily runtime ...

Frequently Asked Questions about Inverters - Mastervolt
Yes, you can. All Mastervolt sine wave inverters can easily and safely supply a computer without the slightest problem or risk. In fact, the output voltage from an inverter is often better than that from the ...

I happen to have a 700 watt 12V to 120V inverter that I was considering connecting to my Model S and using it to power the fish tank and maybe a light or two in the event that the power fails ...

So I have made it easy for you, use the calculator below to calculate the battery size for 200 watt, 300 watt, 500 watt, 1000 watt, 2000 watt, 3000 watt, 5000-watt inverter

The disadvantage is that the 12 V inverter will draw 5 times the current a 60 V inverter draws for the same output power. This current needs to be supplied by the step-down converter. This ...

They can be used for many standard appliances but may cause trouble with delicate electronics or audio equipment. Some equipment may work but run hotter than normal.

The 12V cigarette lighter in a car or truck can be used with a small portable inverter to provide power to charge phones, tablets, laptops, DVD players, light tools and other devices.
