State Electric Company (Stelco) in the Maldives has launched a renewables tender covering solar installations, battery energy storage systems (BESS), and grid extensions.

Power Projects is pleased to share that we have been awarded a comprehensive consultancy and design services package for a large-scale renewable energy project in the Maldives.

It captures excess solar energy generated during the day for use at night or during cloudy periods, ensuring a continuous power supply and reducing reliance on fossil fuels. The BESS also ...

The proposed solar-plus-storage complex is planned to be installed in the archipelago's Greater Male region, with the project to be developed under a design, build, finance, own, operate ...

As part of our commitment to enhancing the energy infrastructure of the Maldives, they invite expressions of interest (EOI) from qualified parties for the following projects:

Microgrid experts at DHYBRID have installed microgrids on a total of 26 islands on the Shaviyani and Noonu Atolls of the Maldives and equipped them with a central monitoring and control system (SCADA).

The Maldivian government has signed a landmark agreement to deploy 38 megawatt-hours (MWh) of battery energy storage systems (BESS) alongside energy management systems ...

The ARISE project includes a target of bringing in 36 MW of new solar PV installations with an estimated cumulative 50MWh of Battery Energy Storage Systems (BESS), and grid ...
