A nationwide analysis by USA TODAY shows local governments are banning green energy faster than they're building ...

Solar is a boon to rural economic development. Energy projects bring in new tax revenue for local entities, which is determined by either the rated capacity, annual production, or a mixture of both, ...

Currently, there are several ways solar panels can be installed to complement agricultural activities. Fixed vertical or tilted panels provide partial shading for crops and vegetables, protecting ...

A nationwide analysis by USA TODAY shows local governments are banning green energy faster than they're building it. At least 15% of counties in the U.S. have effectively halted new ...

These restrictions can include permitting rooftop-mounted solar panel systems but not ground-mounted systems, or limiting system installations to certain property locations, such as a side yard or backyard.

It has been disheartening to see our beautiful farmland displaced by solar projects, especially in rural areas that have strong agricultural heritage. One of the largest barriers of entry for ...

Rural areas and agricultural land present attractive sites for utility-scale solar because of the large parcel sizes that limit conflicts with neighboring properties.

Paradoxically, the states most likely to do this are some that would greatly benefit from solar power, like Oklahoma, Kansas, and Nebraska. This article will list all the states with the largest ...
