Should I buy a battery bank for my RV Solar System?

Your battery bank is a very important (and potentially expensive) component of your RV solar system, so you should do plenty of research on the best RV batteries before you buy.

What are the different types of RV batteries?

"AGM" includes batteries labeled "lead acid", "flooded", and "gel". AGM batteries are now the most popular lead-acid RV batteries. While AGM batteries are slightly more expensive than the other two, flooded batteries require consistent maintenance and gel batteries have low discharge/recharge rates.

What are the best RV batteries?

Battle Born batteries come with a built-in battery management system which monitors charge levels and temperature to protect your batteries and keep you safe. Battle Born stands behind their batteries with a 10 year warranty and lifetime customer service.

What is a lithium RV battery?

"Lithium" includes LiFePO₄ (or lithium iron phosphate) and lithium ion. Almost all lithium RV batteries are LiFePO₄, because this chemistry is very safe and LiFePO₄ batteries have a very long life. Lithium ion batteries, on the other hand, are typically used in cell phones and electric cars because they are lighter and charge faster.
