When renewable power production exceeds demand, batteries store excess electricity for later use, therefore allowing power grids to accommodate higher shares of renewable energy and ...

Tesla's energy division set a new annual storage deployment record of 46.7 GWh in 2025, driving revenue up 26.6% to \$12.8 billion. With improved 29.8% margins, Tesla plans Megapack 3, ...

27.1 GWh of new battery capacity installed in 2025, marking the EU's 12th consecutive record year for battery storage deployment. 55% of all new capacity came from utility-scale systems, ...

Industry Volta's 2025 Battery Report: Costs keep falling, boosting BESS across the globe Volta's annual report now stretches to 750 pages, diving deep into many technical areas, along with ...

BESS helps manage the intermittency of solar and wind, balance supply and demand and provide grid services that improve reliability, flexibility, and stability. California's BESS capacity reached 15.7 GW ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...

Global battery storage installations jumped by 43% in 2025 and are forecast to grow at an average annual rate of 10.8% between 2024 and 2034, according to Wood Mackenzie.

Developers and power plant owners plan to significantly increase utility-scale battery storage capacity in the United States over the next three years, reaching 30.0 gigawatts (GW) by the ...
