Yet, when we carried out research in the automotive industry, battery development didn't even make the top three technological developments expected to have substantial impact on business.

As the Purdue Research Foundation's Vice President for the Office of Technology Commercialization, Chad Pittman oversees the protection of Purdue University's intellectual property and translation of ...

Advanced Battery Development, System Analysis, and Testing To develop better lithium-ion (Li-ion) batteries for plug-in electric vehicles, researchers must integrate the advances made in exploratory ...

With the construction of two hybrid solar PV and battery storage projects launched in the country earlier this year, this strategic expansion underscores Qair's ongoing commitment to ...

NREL focuses on creative answers to clean energy challenges, from breakthroughs in fundamental science to new clean technologies to integrated energy systems.

In this paper, a new battery/ultracapacitor hybrid energy storage system (HESS) is proposed for electric drive vehicles including electric, hybrid electric, and plug-in hybrid electric vehicles.

As EPC contractor, John Cockerill developed the project and ensured careful execution and integration. This project highlights our commitment to facilitate access to green energy and our contribution to ...

French Independent renewable energy company Qair, has announced the start of the construction of two hybrid solar power plants with battery storage in the neighborhoods of Gassi ...
