Sources say that BDS has made breakthroughs in a host of key technologies, achieving the independent development of multiple key components. All the core components of BDS-3 ...

HELSINKI -- China has announced a strategic roadmap for advancing its Beidou positioning and navigation system by 2035, in a move which could have global implications.

Current solar activity requires to establish early warning and monitoring platform through coordination and discussion to eliminate the impact of solar activities on satellite navigation users.

As of the end of 2024, cumulative shipments of BDS-compatible chips and modules in China had reached nearly 2.3 billion units, said the white paper released on Sunday by the Global ...

From the collected telemetry information, the solar panel B (SP-B) of BeiDou-3 M215 satellite underwent pitch-maneuvers around the body-fixed Y-axis on days of year 65-67 of 2024, ...

This paper first introduces the main application of BeiDou system in China's power system, and then introduces the construction situation and various performance indicators of BeiDou III in detail.

The China Satellite Navigation System Management Office issued the "Beidou Satellite Navigation System Development Plan Before 2035", planning to complete the construction of the ...

China is planning to develop its next-generation BeiDou system which will be technologically more advanced and functionally more powerful, and offer higher quality services.
