Our BESS deployments enable fast response, deep cycling, and intelligent load shifting--all critical for meeting the technical and commercial goals of today's renewable energy ...

Middleton Group carried out detailed design for the farm, which has 11,400 solar panels and storage capacity of 11MWh. Innovation is a feature of a unique gas recovery project in Aotearoa New Zealand.

Colocation involves installing BESS alongside other energy generation resources, such as solar or wind farms, within the same site or facility. This approach maximizes the efficiency and utilization of the ...

With Shell Energy's BESS solution, you are boosting your business' bottom line while helping provide grid stability in Australia's energy transition, one battery at a time.

Whether you're developing a utility-scale solar farm, a grid-connected wind farm, or integrating battery storage solutions, our expertise ensures seamless project execution from design to deployment.

This article shares industry-specific insights into the Key Design and Engineering Optimisations for Efficiency in Utility-Scale Solar and BESS Projects, particularly focusing on Solar farms, and battery ...

Our BESS can be paired with solar arrays from 20kW to 5MW, and are auto-start generator compatible for true energy independence and off-grid capability. Our systems are fully air-conditioned and ...

Our experienced team is headquartered in Sydney with a local presence in Queensland, Western Australia and South Australia, and has decades of industry expertise in developing, financing and ...
