What is Bhutan's energy security & sustainable growth policy?

Titled "Empowering Energy Security & Sustainable Growth," the policy consolidates and supersedes several prior frameworks, including the Bhutan Sustainable Hydropower Development Policy 2021, Alternative Renewable Energy Policy 2013, Domestic Electricity Tariff Policy 2016, and National Energy Efficiency & Conservation Policy 2019.

Does Bhutan need long-term energy security?

With growing demand, where the peak power demand has outpaced firm power supply by 125% in 2024 which is expected to increase further, securing the country's long-term energy security has become ever more a priority. For Bhutan, long-term energy security means meeting winter demands when our hydropower generation ebbs to the lowest.

What is Bhutan's national energy policy 2025?

Bhutan's National Energy Policy 2025 (NEP 2025), released in June 2025 by the Ministry of Energy and Natural Resources (MoENR), represents a pivotal shift in the country's energy strategy.

What is Bhutan's hydropower potential?

1.3 Bhutan is endowed with huge hydropower potential together with solar, wind and biomass resources. The techno-economically viable hydropower potential is 33,000 MW from 90 sites as per the Power System Master Plan 2040 (PSMP), where these sites are mostly located outside of the ecological parks and the biological corridors.

The creation of the Bhutan Electricity Authority (BEA) aims to oversee renewable energy sources such as solar power and ensure adherence to set standards. The Act makes it easier for power generation ...

These sessions cover critical topics such as solar grid-interconnection codes, energy efficiency, and seasonal storage to accelerate Bhutan's clean energy progress.

The Electricity Regulatory Authority (ERA) manages licensing, tariffs, and standards. Utilities like Druk Green Power Corporation Ltd. (DGPC) for generation and Bhutan Power ...

In effect from May this year, the regulation will now require individuals or any organisation to register for a license if they install or plan to install a solar power plant.

# Bhutan s solar power generation standard code

Source: <https://www.lesfablesdalexandra.fr/Wed-05-Jan-2022-17693.html>

In exercise of power conferred by section 18 and 19 of the Electricity Act of Bhutan 2001, the Electricity Regulatory Authority hereby adopts the Licensing Regulation for Solar Power Plant

This section investigates the current challenges in electricity generation and distribution in Bhutan and also discusses the opportunities in store for ARE, especially by way of solar PV on-grid systems.

Developed by the Bhutan Energy Research and Development Center (BERDC) with support from the International Solar Alliance (ISA), the roadmap focuses on deploying large-scale ...

This journey requires the collective commitment of our entire nation - the government, the private sector, communities, civil society, citizens, banks and especially that of the utilities like Druk Green ...
