Summary: Bosnia and Herzegovina is accelerating its renewable energy transition, with Banja Luka's photovoltaic power station and energy storage policies leading the charge.

The paper focuses on the possibilities of generating electrical energy by means of on-grid PV solar systems of 1 kW in the Republic of Srpska (Bosnia and Herzegovina).

In Bosnia and Herzegovina (BiH), where significant underutilized agricultural resources and high solar potential exist, agrosolar projects offer an opportunity for the sustainable development ...

In 2021, Bosnia and Herzegovina achieved a 36.6% share of renewable energy in its gross final energy consumption, in line with the general positive trend towards its renewable energy ...

This paper explores the application of RES alternatives in agriculture to provide guidelines for enhancing sustainable agricultural practices in Bosnia and Herzegovina.

Through investments in renewable energy, energy efficiency, circular economy and sustainable agriculture, BiH can reduce its dependence on energy imports, create new jobs and ...

The current review has shown that Bosnia and Herzegovina, compared to other Balkan countries, has significant potential for implementing renewable energy sources and meeting the ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal operating ...
