For Brazil, the 2026 auction could serve as a watershed moment -- defining not just how storage integrates into its National Interconnected System, but how the country approaches reliability ...

Brazil's Ministry of Mines and Energy says it has opened public consultation for a 2026 battery storage auction to contract systems of at least 30 MW that can deliver four hours of power ...

Brazil's Ministry of Mines and Energy has opened a public consultation on the guidelines and structure for the 2026 LRCAP storage capacity auction. The notice was published this week, with the ...

Brazil's federal government will launch its first major battery energy storage system (BESS) tender in April 2026, targeting 2 GW (~8 GWh) of capacity and mobilizing over USD 2 billion ...

The auction will enhance Brazil's power grid reliability by integrating energy storage solutions for electricity generated from renewable sources such as wind and solar.

A public consultation ahead of the auction will be held in the coming days and, according to a draft of auction rules published by the ministry, the procurement exercise will be held for systems ...

"This auction represents a transformative moment for Brazil's energy sector, establishing the foundation for large-scale battery storage deployment while creating substantial investment ...

Changes to Brazil's first capacity reserve auction of 2025 could undermine the expansion of the procurement regime to include battery energy storage systems (BESS) in the second exercise ...
