What are solar export tariffs?

At first, solar export tariffs were created in response to the government launching the Smart Export Guarantee (SEG) in 2020. This initiative compels energy suppliers with 150,000 customers or more to pay households for any renewable energy - including solar electricity - they export to the grid.

Which solar energy suppliers offer SEG tariffs?

Other suppliers offering SEG tariffs include PE Solutions and Pozitive Energy at 5p per kWh, Tomato Energy at 4p per kWh, Voltx Power at 3.02p per kWh, Ruby Electricity at 3p per kWh, and Utility Warehouse at 2p per kWh. These rates are typically available to all solar panel owners regardless of their energy supplier.

Are solar export tariffs more profitable than SEG rates?

But some companies have now released solar export tariffs that are more profitable than their SEG rates. You'll export around 65% of the electricity your panels generate, on average - a figure we've based on a household experiencing average UK irradiance with a 4.6kWp solar panel system and a 5.2kWh battery, using 3,400kWh of electricity each year.

Should you sign up for a solar export tariff?

Signing up for a solar export tariff is the best way to profit from the excess electricity your solar panels generate. If you choose one of the top tariffs, you can make hundreds of pounds by selling electricity you weren't going to use anyway - and help make the grid greener.

Our SEG / Export League Table highlights the most competitive export tariffs available to UK homeowners. The table is ranked by each supplier's best guaranteed fixed export rate, as fixed ...

Compare all Smart Export Guarantee (SEG) rates from UK energy suppliers. Updated rates showing how much you can earn per kWh of electricity exported to the grid. The Smart Export Guarantee ...

Here's how exporting solar energy to the grid works, how to sign up for an export tariff, and how much you can expect to earn.

Our services include high-quality British photovoltaic module export company-related products and solutions, designed to serve a global audience across diverse regions.

Export renewable-energy equipment from the UK with confidence. Learn about IEC standards, trade finance, and seamless CDS filing via Customs ...

The UK has emerged as a key player in photovoltaic module exports, driven by its advanced manufacturing capabilities and commitment to renewable energy. In 2022 alone, the country ...

Export renewable-energy equipment from the UK with confidence. Learn about IEC standards, trade finance, and seamless CDS filing via Customs Declarations UK.

The Smart Export Guarantee also known as (SEG) is the Government's replacement for the earlier Feed in Tariff or (FIT). The scheme rewards eligible renewable energy providers with cash ...
