The Hungarian government has earmarked HUF 62 billion (\$169 million) for grid-scale energy storage projects in a bid to facilitate further deployment of renewable energy sources.

Swiss-based energy company MET Group has officially inaugurated Hungary's largest standalone battery energy storage system (BESS) at its Dunamenti Power Station in ...

Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition.

As renewable energy adoption accelerates globally, the Budapest power storage power station has emerged as a critical infrastructure project in Central Europe. This article explores its technical ...

Energy storage capacities will double over the next year, with the aim of providing at least 1 GW of storage capacity by 2030. With public funding totalling 33 billion forints (approx. 80 ...

The 14 energy sources we have studied have been categorized according to whether the power plant generates electricity from thermal or renewable energy and pumped-storage power ...

E.ON has installed a new battery energy storage system in Soroksár to help stabilize Hungary's power grid and enable more household-scale solar systems to connect to the network.

Both the energy storage unit and the gas engines play an important role in the regulation of the electricity system through the ALTEO Virtual Power Plant. The gas engines - in parallel - ...
