Met Group Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition.

Hungary is taking a significant leap forward in its renewable energy sector with the launch of four new solar energy storage projects by Alteo, a Budapest-based renewable energy company.

As solar energy adoption accelerates in Budapest, the demand for reliable storage systems has never been higher. This article explores how advanced solar energy storage solutions are reshaping ...

Some 338 million forints of funding from the European Union's Recovery and Resilience Facility (RRF) is supporting the 6 MW facility that can store the electricity generated by around 350 ...

Discover how Budapest's businesses are slashing energy bills and achieving energy independence with smart solar storage solutions.

E.ON Hungaria has unveiled a state-of-the-art storage system in Soroksar (23rd district of Budapest), doubling its local capacity and setting a new benchmark for smart grid integration in the ...

As part of the IElectrix project, Hungary installed two grid-connected battery energy storage systems (BESS) at Zanka and Dzs, the first such systems owned and operated by a Hungarian DSO. A ...

This article will analyze Hungary's unique energy storage demand and introduce high-capacity, robust solutions like the 215kWh Energy Storage System and the 125kW/261kWh LFP ...
