What is a solar inverter?

Inverters convert direct current (DC) electricity produced by solar panels into a sinusoidal alternating current (AC) of 220V, which is suitable for most electrical appliances. The assortment of inverters for solar systems on the market today is huge.

How to care for a solar panel inverter?

Pick a dry cold place for your inverter out of direct sunlight. It is preferable to place it near a battery to shorten the travel distance for electricity. This device needs proper air circulation to function so it's recommended to leave around 12 inches of free space around it. Tips for looking after a solar panel inverter include:
