The Clean Energy Council (CEC) approved photovoltaic (PV) modules are to be used in-conjunction with REC Registry bulk upload guidelines.

Browse the Clean Energy Council's list of approved (fire-tested) solar photovoltaic (PV) modules suitable for installation under the Small-scale Renewable Energy Scheme (SRES).

Explore how we utilize the California Energy Commission's certified solar equipment database to provide precise specifications and performance ratings for solar panels and inverters, empowering informed ...

When an inverter meets CEC requirements, it means the device has been thoroughly tested and proven to convert DC power from solar panels to usable AC power with minimal energy loss.

Solar energy is the fastest growing and most affordable source of new electricity in America. As the cost of solar energy systems dropped significantly, more Americans and businesses ...

The Energy Commission's Solar Equipment Lists include equipment that meets established national safety and performance standards. These lists provide information and data that support existing ...

Here's a simplified worksheet to help you get a general idea of the number of panels you will need. Be sure to crosscheck the number of panels with the California EPBB calculator for the most accurate ...

The Energy Commission's Solar Equipment Lists include equipment that meets established national safety and performance standards. These lists provide information and data that support ...
