Should I Leave my inverter on all the time?

Leaving the inverter on all the time means that you can power up your appliances quickly, without having to wait for the inverter to start up from standby mode. This is particularly important for devices that require an immediate power supply, such as medical equipment or communication systems.

Can a high powered inverter run 24/7?

High powered inverters have been built to run 24/7. As long as you use the inverter correctly there should be no problems. Portable inverters are a different story. With a capacity of under 500 watts, they are designed to run a limited number of appliances and may need shutting down. Refer to the manufacturer website for details.

Can a solar inverter run AC?

An inverter is primarily used to convert DC to AC power and run appliances. You can run DC powered devices directly on solar power, but not AC. Turn off the inverter if you do not use AC power. Without an inverter you cannot use any device that runs on AC, which means most household appliances.

What if my inverter runs only on battery power?

If your inverter runs solely on battery power, you will have to turn it off at some point. Specifically when the battery has to be replaced or recharged. If you completely discharged the battery bank, the inverter cannot run. Turn off the inverter and recharge the battery. When it is full, turn the system on again.
