Many feral and stray cats instinctively seek warm, dry spaces like garages, sheds, or insulated hiding spots under porches, however, if your pet cat spends significant time outdoors, ...

Cold tolerance is influenced by age, health, and coat type. If your cat is too cold, you may see shivering, lethargy, decreased appetite, curling up into a tight ball, and being cold to the touch. ...

Cats are just as vulnerable to a cold snap as any other animal and they do often need help surviving the chillier winter months. If you have a cat that goes outside, they need to be ...

Pet owners should take into account their cat's individual needs and behaviors when deciding whether they can safely be outdoors in the winter." In addition, we consulted with a wildlife biologist who ...

Even for those cats for whom the human household carries positive associations, the drive to experience the mental and physical stimulation of the outdoors can make it almost impossible to ...

A complete, expert-reviewed guide to helping outdoor, stray, and feral cats stay safe in winter. Learn shelters, bedding, food, water, cold-weather risks, and humane safety tools.

Yes, their thickened winter coats help feral and stray cats weather winter's chill, but they still need warm, dry, well-insulated and appropriate-sized shelters.

Without access to consistent shelter, how are outdoor cats able to survive? We've taken a look, and our guide has all the details.
