---

High peak hour power prices in China have emerged as the driving force behind a revival in the price of lithium, a key battery metal, which has risen by 25% over the past four weeks, and 50%...

Chinese firms are on track for a 75% jump this year in global shipments of lithium-ion battery cells for energy storage, according to one estimate.

Owned by state-owned infrastructure giant PowerChina, this project is touted as the world's largest power generation-side electrochemical energy storage system- meaning it is co ...

Imagine a battery pack so powerful it could power 300,000 homes during peak hours - that's exactly what China's latest energy storage lithium battery installations are achieving.

China has taken the lead, and global demand for lithium batteries is climbing fast. These trends show how battery storage is reshaping energy systems around the world.

Listed below are the five largest energy storage projects by capacity in China, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a ...

On October 10, 2025, China's first large-scale lithium-ion battery energy storage power station commenced operations in Guangxi Province. This project, which is located in the Nanning area, aims ...

PowerChina has begun construction on what is claimed to be the world's largest generation-side electrochemical energy storage project.
