Is community solar a good option?

Community solar can be a great option for people who are unable to install solar panels on their roofs because they are renters, can't afford solar, or because their roofs or electrical systems aren't suited to solar. Community solar is rapidly growing across the country.

What is a community solar program?

All community solar programs serve an exclusive set of subscribers within a utility or community choice aggregation service territory. Participation in community solar is always by choice. Subscribers opt into the program, either through contractual payments or some nonfinancial transaction.

What are the benefits of community solar?

In addition to household savings, other benefits of community solar include resilience during blackouts or weather events, community wealth building, and local job creation. Learn more about the meaningful benefits of community solar.

Does a community solar project save money?

If the credit per kilowatt-hour from the utility is higher than the price per kilowatt-hour of the community solar subscription, the subscriber saves money on their electricity costs. A community solar project is not located at the house or business where the subscribers use electricity.
