This national and international open call, part of Resolution SE 67/2025, marks Argentina's first large-scale effort to integrate new electricity storage infrastructure into urban distribution networks.

Argentina receives 1.3GW bids for first energy storage tender Jul 21, Argentina has received more than 1.3GW of energy storage applications for its first battery energy storage system (BESS) tender.

This article aims to reduce the electricity cost of 5G base stations, and optimizes the energy storage of 5G base stations connected to wind turbines and photovoltaics.

Argentina has taken a major step toward modernizing its energy infrastructure with the launch of a 500 MW battery energy storage system (BESS) tender under the AlmaGBA program.

Argentina has taken a decisive step toward modernizing its power infrastructure, drawing international attention with its first large-scale battery energy storage tender.

The tender, overseen by CAMMESA -- Argentina's Wholesale Electricity Market Administration Company -- invites bids from developers capable of deploying new battery systems ...

Understanding these innovative applications and future trends is critical for operators, equipment manufacturers, and energy storage providers to navigate the evolving landscape and build the ...

In a groundbreaking 2023 pilot, Vodafone Germany demonstrated how base station storage systems can stabilize regional grids through vehicle-to-grid (V2G) integration.
