We design and build container generator units, shipping container power units, and modular generator housing that meet the highest standards of safety and performance.

Our factory-packaged containerized generator sets are designed to address these challenges comprehensively. They offer a reduced footprint, improved ease of transportation and significantly ...

The MOBISUN PLUS Solar Power Trailer is specifically designed to meet the demanding power needs of construction site applications in urban, rural, and remote locations to replace diesel generators.

Ready to Transition Beyond Diesel? Discover the next generation of mobile, autonomous clean power. MOBISMART integrates solar, fuel cells, and batteries into hybrid systems that deliver where diesel ...

Renewable energy, solar power, hydroelectric, or harnessed by the wind, energy and power sources abound. Interport has worked with various power generation and energy customers to deliver unique ...

SunWing(TM) offers a portable solar and battery power solution as a trailer, making it easy to have clean energy on the go.

Discover advanced containerised generator sets featuring remote monitoring, environmental protection, and scalable power solutions for reliable industrial and commercial power generation needs.

In short, you can indeed run power to a container - either by extending a line from the grid or by turning the container itself into a mini power station using solar panels.
