CPI Technologies offers transportable solar arrays and complete photovoltaic off-grid packages. Quick attach flat mount solar arrays to roofs, deploy solar trusses on the ground, or span areas creating ...

The Photovoltaic Micro-Station Energy Cabinet is a hybrid power compact solution for remote energy and outdoor telecom sites.

Used as a stand-alone system or in conjunction with solar power to reduce energy storage needs. Also used in conjunction with solar, biofuel and diesel-powered micro-grids for commercial and military ...

CPI's cabinet ecosystem combines intelligent power distribution, remote power and environmental monitoring, access control and system optimization with integrated airflow management and ...

Transportable Solar Generators that have battery backup and are easy to use and powerful. Our selection of Solar Generator Units provide a Solar Power Package that is easy to store, transport, ...

Its robust steel body and frame give it a maximum load capacity of 300 pounds. Vents allow airflow to keep equipment cool, and users can install additional fans for equipment that needs more cooling. ...

The SOLAR-FAST TM technology enables rapid deployment of both fixed tilt and single-axis tracker modular solar segments, significantly reducing both installation labor and schedule.

Outdoor power cabinets, DC power systems, batteries, rectifiers, radio enclosures, and equipment racks for telecommunications equipment backup and protection, site optimization, power protection, and ...
