Maja Pokrovac, director of RES Croatia, highlighted that increasing battery storage capacity could reduce electricity prices by 25% by 2030, stressing the urgent need to accelerate the ...

Hybrid solutions - such pumped storage power plants combined with wind and/or solar farms - are becoming increasingly important for the generation and storage of clean, renewable energy, as well ...

The project will contribute to the country's energy transition goals, reduce its reliance on fossil fuels and help to stabilise the electricity system at a time of rising renewable penetration.

The conference will focus on integrating flexibility into the power grid, with a special emphasis on battery storage systems, which are becoming increasingly vital for the stability and efficiency of the power ...

As Croatia accelerates its transition to renewable energy, efficient energy storage stockpiling has become a cornerstone of national energy security. This article explores how Croatia is leveraging ...

With competitive pricing and innovative designs, local manufacturers are well-positioned to meet growing global demand. Need a customized storage solution? Reach out to discuss how Croatian ...

Solar Flex Croatia 2025 will showcase the latest advancements in solar panels, inverters, and energy storage solutions. These technologies can help Croatia achieve its solar energy targets ...

An energy storage system will soon be installed at the largest solar power plant in Croatia, which has a capacity of 3.5 MW, said Zeljko Tuksa, President of the Managing Board of Koncar - Power Plant ...
