This fully integrated energy storage system features a comprehensive all-in-one design, incorporating essential switches for battery fuses, photovoltaic input, utility grid, load output, and diesel generators.

design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your ...

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no ...

The Intech Energy Container is a fully autonomous power system developed by Intech to provide electricity in off-grid locations. Each container is equipped with a photovoltaic array, a battery bank, ...

Our foldable solar containers combine advanced photovoltaic technology with modular container design, delivering rapid-deployment, off-grid renewable energy with industry-leading efficiency.

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and ...

Together, these enclosures deliver 15 kW continuous (20 kW peak), operating silently and reliably even in harsh climates. Designed for telecom, data edge, industrial, and government applications, the ...

In remote areas with limited access to the grid, a 15kW on grid solar system combined with energy storage solutions offers a reliable and sustainable power source, benefiting off-grid communities and ...
