Precisely, these panels normally use very efficient thin-film solar technology, which is lightweight, flexible, and easy to fold. In the best scenario, these high-efficiency solar panels would ...

Drug Induced Liver Injury (DILI) presents a critical challenge to the pharmaceutical industry and patient care.

DILI has two types: intrinsic and idiosyncratic. Patient, environmental, and drug-related factors may play a role in the pathogenesis of DILI. In the United States, antibiotics and antiepileptic ...

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and ...

Drug-induced liver injury (DILI), or drug-induced hepatotoxicity, is an under-recognized and relatively rare cause of acute liver failure (ALF) that remains an important topic of discussion in hepatology for ...

It lies on Ombai Strait on the northern coast of Timor island, the easternmost of the Lesser Sunda Islands. Dili is the chief port and commercial centre for East Timor; it also has an airport. The ...

The DILIRank dataset consists of 1,036 FDA-approved drugs that are divided into four classes according to their potential for causing drug-induced liver injury (DILI). The DILI classification...

Drug-induced liver injury (DILI) and herbal-induced liver injury (HILI) are well-recognized and symptomatically can mimic both acute and chronic liver diseases.
