What is distributed solar?

Distributed solar contrasts strikingly with utility-scale solar energy (USSE) enterprises, as the latter have relatively larger economies of scale, high capacity (typically >1 MW), and are geographically centralized--sometimes at great distances from where the energy will be consumed and away from population centers.

What is distributed solar PV?

(Distributed refers to smaller solar power generation facilities that are located close to consumers and connected to distribution systems, with access voltage below 35 kilovolts.) China's new installed capacity of distributed solar PV in 2017 was 19.4 gigawatts --3.6 times higher than it was just a year before.

When will BC module prices be added in Europe?

In Europe, the public pricing for BC modules (residential and C& I) will be added from June 2025. InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends and solar panel costs with our comprehensive market analysis.

What types of solar data are available?

These data are made available in several formats, including: * Distributed solar is defined here to include residential systems, roof-mounted non-residential systems, and ground-mounted systems up to 5 MW-AC. Ground-mounted systems larger than 5 MW-AC are covered in Berkeley Lab's separate U.S. Utility-Scale Solar annual data update.

Berkeley Lab collects, cleans, and publishes project-level data on distributed* solar and distributed solar+storage systems in the United States. The data are compiled from a variety of sources, ...

The data in Anza's U.S. Distributed Generation Q4 Solar Module Pricing Insights Report represents median DG list prices from the more than 35 module vendors participating in the Anza ...

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends and solar panel ...

US distributed-generation solar module prices rose in the third quarter as developers accelerated procurement to meet tax credit deadlines, according to supply chain platform Anza.

Since peaking in August, prices for solar modules for distributed generation (DG) projects such as rooftop, commercial, industrial, and community solar in the United States have ...

Comprehensive guide to solar module prices in 2025. Current costs, market trends, buying strategies, and price forecasts. Updated with latest data.

The average price of solar panels used in distributed generation projects in the US reached US\$0.27/W by the first half of the year.

We compiled our platform median solar panel pricing data from more than 95% of the U.S. supply into a free quarterly pricing insights report. This trend data tells the story of the U.S. distributed generation ...
