Where is a wind farm located?

The wind farm site was located on a sandbank approximately 27 kilometres (17 mi) north of the north Norfolk coast, and 28 kilometres (17 mi) east of the Lincolnshire coast, with an estimated maximum capacity of 620 MW. The scheme was developed in association with AMEC and the RES Group.

Will a wind farm reopen if Trump shuts it down?

A federal judge ruled Monday that work on a major offshore wind farm for Rhode Island and Connecticut can resume, handing the industry at least a temporary victory as President Trump seeks to shut it down. Clean energy is surging despite political attacks. But a slowdown may be looming

Are wind farms a 'loser'?

The administration did not reveal specifics about its national security concerns, but Trump said Friday while meeting with oil industry executives about investing in Venezuela that wind farms are "losers." He said they lose money, destroy the landscape and kill birds. "I've told my people we will not approve windmills," Trump said.

Construction of a major offshore wind plant can resume, a judge in Massachusetts ordered on Tuesday, marking the fourth such ruling this month. Judge Brian Murphy of the US District Court ...

A federal judge ruled Monday that work on a major offshore wind farm can resume, handing the industry at least a temporary victory as President Trump seeks to shut it down.

Shanghai Fengxian Bay Retrofit and Upgrade wind farm is a wind farm in pre-construction in Fengxian District, Shanghai, China.

Located off the coast of Fengxian district on the northern shore of Hangzhou Bay, the project forms part of Shanghai's broader strategy to integrate offshore wind and solar energy.

Shanghai Fengxian Offshore wind farm is an operating wind farm in Fengxian District, Shanghai, China. The map below shows the locations of the wind farm phases: Loading map...

A district court judge struck down the stop-work order on the Sunrise Wind project.

The company generates electricity from coal-fired plants, gas-fired plants, IGCC, gas power, wind and solar

power units. Its applications are used in research and technology.

The project is part of China's efforts to expand its renewable energy capacity, particularly in offshore wind power. It aligns with national goals to reduce carbon emissions and increase the...
