The Dominican Republic is aiming to generate 25% of its electricity from renewable sources by 2025, as part of its commitment to energy diversification. Solar energy will spearhead this ...

This technology optimizes sunlight exposure and maximizes production, reaching 189.07 GWh annually--enough to power 78,000 Dominican households. The plant is expected to begin ...

ACCIONA Energía announced today the development of a new photovoltaic project in the Dominican Republic, the Pedro Corto solar plant, in collaboration with Grupo País.

The Dominican Republic has officially inaugurated Cotoperí Solar, the largest PV project in Central America and the Caribbean, in a ceremony led by Vice President Raquel Peña.

The project helps Dominican Republic to reach its goal until 2025, the year in which they expect 25% of the electricity consumed by the country to come from renewable energies, and has generated more ...

The complex, made up of three solar farms located in La Romana province, is expected to generate 286 GWh of electricity per year, enough to meet the demand of 166,000 households.

The region's most ambitious solar panel project is at the Caribbean Plant in the Dominican Republic, which has 2,667 panels that generate 62,000 kilowatts per month.

The Dominican Republic's commitment to solar energy in public infrastructure has demonstrated remarkable success, with numerous projects showcasing the viability and benefits of ...
