How is the EU leading the way in energy storage?

The EU has developed a forward-thinking, supportive regulatory framework to encourage energy storage deployment as part of its ambitious clean energy and climate goals. Here's how the EU is leading the way: 1. Clean Energy for All Europeans Package

Are solar and storage delivering European energy security and competitiveness?

The new reports underline the potential of solar and storage delivering European energy security and competitiveness. 'Embracing the benefits of Hybrid PV systems' - which includes solar hybrid projects with storage, wind, or both - estimates that hybrid projects have a 10% lower Levelised Cost of Electricity compared to standalone projects.

Is energy storage a key part of the grid of the future?

Image: Michael Dorgan / Solar Media. Flexibility will be a critical piece of the grid of the future and energy storage will play a central role in that, keynote speakers said at Solar Media's Energy Storage Summit Central and Eastern Europe (CEE) 2024 today.

What is the European energy storage inventory?

In March 2025, the Commission launched the European Energy Storage Inventory, a real-time dashboard that displays energy storage levels across different European countries. It is the first European-level tool of its kind and offers energy storage data across a full range of technologies.

This position paper, prepared by the Energy Storage Europe Association, assesses the system value of long-duration energy storage, identifies barriers to deployment, and proposes recommendations to ...

Image: Michael Dorgan / Solar Media. Flexibility will be a critical piece of the grid of the future and energy storage will play a central role in that, keynote speakers said at Solar Media's ...

The Battery Storage Europe platform will highlight storage case studies and regulatory best practices across Europe and operate as SolarPower Europe's external arm of reinforced ...

For example, electrothermal energy storage stands out for its capacity to electrify heat while storing energy, making it well-suited for meeting the continuous and large-scale heat demands ...

A lack of grid infrastructure is a key challenge in Eastern Europe, and was discussed at Large Scale Solar

Central Eastern Europe 2024.

Why Eastern Europe is Betting Big on Solar Storage Imagine powering entire cities using sunlight even after sunset. That"s exactly what countries like Poland and Romania are achieving through cutting ...

The main energy storage method in the EU is by far "pumped storage hydropower", which works by pumping water into reservoirs when there is an electricity surplus in the grid - for example ...

Speakers at LSSCEE 2024 discussed key topics for the Eastern European solar sector, including storage, private investment and risk management
