How do you store an e-scooter?

Avoid outdoor storage whenever possible. If you must store your scooter outside, use a waterproof cover and find a sheltered spot. Never leave your e-scooter exposed to rain or snow for long periods. The ideal temperature for scooter storage is between 50-85°F (10-30°C). Keep your scooter away from heaters, radiators, and direct sunlight.

How do I take care of my electric scooter storage needs?

Taking care of your electric scooter storage needs doesn't have to be complicated. Just remember to keep it indoors, maintain some battery charge, and place it somewhere that's both convenient for you and safe for your scooter. A little effort now means your scooter will be ready to ride when you are!

Can you store an electric scooter in the winter?

So, to be on the safe side, you'll want to store your e-scooter during winter. The last thing you want to do is let your electric scooter sit in the cold during those harsh winter months. If you've been riding it for a while, then you should know that there are some very specific dos and don'ts when storing your electric scooter in the wintertime.

What temperature should a electric scooter be stored in?

Room temperature (around 68-77°F) is best for electric scooter storage. This keeps the battery and electronics in good condition. Avoid very cold places like unheated garages in winter. Cold temperatures below 32°F can damage your battery. Don't store your scooter in hot places either.
