Global energy storage additions are on track to set another record in 2025 with the two largest markets - China and US - overcoming adverse policy shifts and tariff turmoil.

This graphic highlights the top 20 battery storage capacity markets by current and planned grid capacity in gigawatt hour (GWh).

This treemap, created in partnership with the National Public Utilities Council, visualizes which countries had the most grid-scale battery energy storage systems (BESS) in 2023.

Find the latest statistics and facts on energy storage.

But which countries have made the biggest strides in technology development? Which governments are providing the best incentives for battery energy storage investment? And which ...

According to Rho Motion's BESS database as of February 2025, by 2027 the top 20 countries' deployed BESS grid capacity will have grown by at least 289% compared to 2024. That ...

Battery storage capability by countries, 2020 and 2026 - Chart and data by the International Energy Agency.

By the end of 2023, 43 jurisdictions had in place policies for energy storage, including regulatory policies, targets, and fiscal and financial incentives. China more than tripled its investments in battery ...
