Why do you need a box filter?

Today we've advanced these filters to provide a high level of protection in a small footprint. These box filters can reduce fine contaminants in critical applications and protect against small particles that carry viruses and bacteria. The space-saving design helps reduce costs of shipping, storage and handling.

What is a high-efficiency box filter?

The first high-efficiency box filter was invented -- by AAF -- 60 years ago. Today we've advanced these filters to provide a high level of protection in a small footprint. These box filters can reduce fine contaminants in critical applications and protect against small particles that carry viruses and bacteria.

What is a box/cartridge filter?

Box/Cartridge filters are made from rugged materials that help the filter to hold its shape during difficult operating conditions like variable air volume, high-temperature, and turbulent airflow. General Aire offers a wide range of box/cartridge filters that help achieve the indoor air quality you require.

What is a bag filter?

AAF invented the bag-style filter and has continued innovating ever since. Today, thanks to several patented systems, our bag filters provide improved efficiency, long-lasting filtration and easy installation. The filters are designed to remove airborne particulates and tested to meet strict standards of performance.

A low-cost, scalable fabrication technology developed at MIT can integrate fast, efficient gallium nitride transistors onto a standard silicon chip, which could boost the performance of ...

MIT researchers developed a new fabrication method that could enable them to stack multiple active components, like transistors and memory units, on top of an existing circuit, which ...

The Power Perfect Box Wire-In effectively filters and cleans the electricity coming in from your utility or smart meter, as well as the harmonics created within your own electrical system.

While the Satic power perfect box does not let the electricity cause such harm. All in all, the Satic power perfect box is an economical and efficient electricity filtering solution. It is made of cutting-edge ...

A look at how AI can be used to help support the clean energy transition by helping to manage power grid operations, plan infrastructure investments, guide the development of novel ...

By wiring directly into your circuit breaker box, the filter cleans all the electricity coming into your home at the point of entry! Prolongs the life of your appliances and digital equipment and allows them to run ...

Satic's Power Perfect Energy Management System comes in three sizes and is its flagship product for filtering and conditioning your power to provide clean energy to home or business.

Liquid air energy storage could be the lowest-cost solution for ensuring a reliable power supply on a future grid dominated by carbon-free yet intermittent energy sources, according to a new ...
