How will Portugal improve grid resilience after April blackout?

Government outlines EUR400 million plan to strengthen grid resilience after April blackout. Portugal will launch a competitive tender for 750 MVA of battery energy storage before January 2026, as part of a broader EUR400 million package aimed at improving grid reliability and preventing future blackouts.

Can BNZ invest in Portugal?

A clear example comes from BNZ, a Spanish independent power producer backed by global investment capital, which has increased its planned investment in Portugal to as much as EUR600 million.

How will a 137 million euros investment help the energy sector?

Energy Minister Maria da Graca Carvalho said on Monday about 137 million euros of the investment would go towards improving the operational and control capacity of the electricity grid to help it deal with complex intermittent renewable power sources such as wind and solar.

How much electricity does Portugal use?

Portugal has only about 13 megawatts of battery storage capacity, and the goal is to reach 750 megawatts, although no timetable has been set yet. According to the latest daily data from REN, electricity consumption in Portugal stood at 115 GWh on June 20. (\$1 = 0.8581 euros)

Portugal's battery storage boom steadies prices, slashes blackouts and opens tech roles. Discover how new policies could reshape your power bill.

Portugal will launch a competitive tender for 750 MVA of battery energy storage before January 2026, as part of a broader EUR400 million package aimed at improving grid reliability and ...

Key trends include the rising adoption of lithium-ion batteries for both residential and utility-scale applications, as well as the development of innovative storage technologies such as flow batteries ...

The renewable energy landscape in Portugal is moving into a new phase, marked by stronger commitments from international investors and the integration of storage technologies into ...

Summary: As Lisbon emerges as a hub for renewable energy innovation, advanced energy storage systems are solving critical challenges in grid stability and solar/wind integration.

For these reasons, energy storage has moved from being a strategic option to becoming the central pillar of

power grid stability in Portugal. Currently, the main form of large-scale storage in ...

Estimates indicate that global energy storage installations rose over 75% (measured by MWhs) year over year in 2024 and are expected to go beyond the terawatt-hour mark before 2030.

It seeks to build a comprehensive energy storage roadmap for Portugal, outlining storage targets for 2030, 2040 and 2050, and exploring the regulatory and market actions that should be implemented ...
