TDK Corporation (TSE:6762) announces the HVC50, a high-voltage DC contactor designed for connecting or disconnecting lithium-ion batteries with up to 1500 V in traction applications, energy ...

Entering the high voltage DC contactor market for new energy applications presents formidable obstacles. These barriers stem from intense technical complexity, stringent certification ...

The rise of electric heavy trucks and energy storage systems has opened unprecedented opportunities for high-voltage DC contactors. Manufacturers who lead in arc suppression, reliability ...

TDK Corporation has launched the HVC50, a high-voltage dc contactor engineered for the safe and reliable connection or disconnection of lithium-ion batteries in electric vehicle (EV) ...

Littelfuse offers both polarized and non-polarized high-voltage (HV) DC contactors or relays to meet a wide range of electric vehicle (EV) application requirements.

ECPN, ECPS and ECP Series high voltage contactors are specifically engineered for battery energy storage systems, electric vehicle charging infrastructure, electric marine vessel charging, and critical ...

This article provides a general introduction of the high-voltage contactors in EV and HEVs, and presents several approaches on how to drive the high-voltage contactors.

Designing high-voltage contactors for electric vehicles and renewable energy systems necessitates careful consideration of performance, reliability, and safety.
