On July 4, 2025, the One Big Beautiful Bill Act became law, changing how commercial solar energy projects qualify for federal incentives. The update introduces new timing gates that ...

Solar tax incentives are tax cuts by the government to reduce the overall cost of a business's solar panel system. There are both federal and state tax credits, plus additional rebates and incentives that can ...

Commercial taxpayers may now also choose a Production Tax Credit (PTC) for solar instead of an ITC. The PTC rate is 1.5 cents (adjusted for inflation, it is presently 2.6 cents). The full value of the PTC is ...

The following are some examples of incentives and policies associated with a solar PV system that typically do not reduce the tax basis related to the ITC (but some may be considered ...

While the PTC is calculated based on the electricity produced by a system, the ITC is calculated based on the cost of building the system, so understanding what expenses are eligible to include is ...

As of 2025, the federal ITC provides a 30% tax credit for qualified commercial solar installations. This rate is scheduled to remain at 30% through 2032, after which it will step down to ...

With a host of tax and incentive programs, there are many reasons for taxpayers to install solar power generation systems. The tax benefits can include income tax credits, breaks on ...

These facilities or property will be treated as a 5-year property for purposes of cost recovery, leaving them with lower taxable income in the earlier years of a clean energy investment.
