---

When we installed solar panels in 2023, it marked a significant shift in our home energy consumption. As a former journalist who notes every detail, I wanted to record a full year of data ...

There is no (affordable) way that solar alone could provide me with 100% of my energy load. While I have long been a proponent of battery technology as a pair to solar, I've usually ...

After working in the solar industry for well over a decade, in June 2019, I made the decision to install solar panels on my house. A lot has changed since then. I've had a job change, we experienced a ...

Reading about real homeowners and their experience made me realize no one-size-fits-all solar setup exists. Before going solar, read case studies, watch journeys, join Facebook ...

What you think they do is one thing, but what they actually do can be completely different! Here are real life solar panel experiences, dos and don'ts.

Want to go solar but not sure who to trust? EnergySage has your back with free and transparent quotes from fully vetted providers in your area. To get started, just answer a few ...

A Redditor posted a lengthy review of their experience with the solar panel installation process and the first 11 months of use in a subreddit dedicated to homesteading.

To provide a closer look at what it's really like to adopt solar energy, we've gathered stories from various homeowners who have made the leap to solar panels. For many homeowners, the ...
