A Finnish energy company, Ilmatar Energy, is planning to build a massive 400 mw solar power plant in Sodankyl&#228;, Lapland, near the Arctic Circle.

These particles interact with Earth's magnetic field, producing more frequent and intense auroras. In other words, 2025 will be a golden year for sky-watchers. Expect auroras to light up the ...

In Finland, solar electricity has so far been a financially competitive alternative only if the self-consumption rate has been high. Now, however, the situation is changing, as solar farms are ...

Finland's utility-scale solar capacity soared in 2025, adding a record 227 MW. The article covers major projects like Utaj&#228;rvi, Europe's northernmost large-scale park in Simo, upcoming ...

We have developed a large series hot selling solar garden landscape lighting products, including solar pathway lights, solar lawn lights, solar wall lights, solar pillar lights, solar fence post lights, solar yard ...

Technological development, falling costs and climate goals have together accelerated the spread of solar power in Finland, although its location in the north poses its own challenges.

From vast solar parks to smart fabrics and solar-powered food production, Finnish researchers and companies are transforming low-light conditions into high-impact innovation.
