Solar-plus-battery microgrids (unlike generators) are not susceptible to the fossil supply chain issues that hit Florida this past hurricane season. Solar and battery costs continue to decline, ...

When Hurricane Ian hit Florida, Georgia, Virginia and the Carolinas in 2022, more than two million people lost power. But microgrids kept critical services running at hospitals, universities,...

In addition, the system provides the entire community with on-site backup power, meaning that it is less likely to experience blackouts during heavy storms -- no small concern in Florida, ...

Energy demand is at a pivotal moment and lawmakers must take bold steps to develop a plan that increases Florida's energy independence and lowers costs by deploying solar power, ...

U.S. Microgrid Market Size & Trends The U.S. microgrid market size was estimated at USD 14.82 billion in 2024 and is projected to grow at a CAGR of 18.2% from 2025 to 2030. Market growth is being ...

Florida public power utility OUC is collaborating with Capacitech Energy in a microgrid project to demonstrate Capacitech Energy's largest deployment to date of the PowerLink, a cable ...

It's generally more difficult for private developers to build sophisticated microgrids in states like Florida that did not undergo industry restructuring. Utilities in these states have more monopoly sway.

When the main electric grid loses power, the microgrid goes into island mode (i.e., operates independently of the main electric grid) and serves its own customers with the generation and other ...
