The future of energy in data centers is becoming a mix of sources coupled with battery energy storage within a microgrid as the availability of power is not to be relied only in one source.

DC Microgrid in a converter system for DC grids for small DC Microgrids, e.g. residential buildings, all in one Device solutions are very easy to install.

Industrial and outdoor battery cabinets for Ni-Cd and lead-acid batteries. Indoor & IP65 outdoor solutions with thermal control and long service life.

The modular expandable cabinet serves as the basis, making it ideal for the production-related storage and use of electronic systems and tools with its ventilated storage space.

"With our Vertiv EnergyCore battery cabinets, we are delivering exactly what our customers and our industry need - compact, high-density energy storage capable of operating safely ...

With advanced BMS intelligence for precise State of Charge (SoC) and State of Health (SoH) tracking, these battery cabinets simplify installation, reduce maintenance, and optimize runtime.

Based on Li-ion battery technology, the system supports the mix of new and used batteries and includes a three-level battery management system (BMS). These qualities ensure an intelligent battery ...

We specialize in designing and manufacturing high-performance energy storage systems, offering a wide range of battery cabinets and containerized solutions for commercial, industrial, renewable ...
