In April 2024, a household in Grenada successfully implemented a 20kWh wall battery home energy storage system provided by GSL ENERGY. This system, integrated with a Deye hybrid ...

From hurricane resilience to long-term savings, home energy storage systems are rewriting Grenada's energy story. As your local distributor, we bridge global innovation with Caribbean practicality.

Proposes the establishment of a 100% renewable energy target for both the electricity and transport sectors for 2030. The policy focuses on utility scale geothermal generation, wind and waste-to ...

That's Grenada today - a nation swapping diesel generators for smart energy storage while dancing to soca beats. With IMF projecting 3.9% GDP growth for 2025 [1], the "Island of Spice" is spicing up its ...

On April 30, 2024, GSL Energy installed a 20kWh home wall-mounted lithium iron phosphate (LiFePO4) energy storage system in Grenada. This system offers reliable backup power, energy independence, ...

Our geothermal project is currently in its exploration drilling phase. If the exploration is successful, it will prove that Grenada has sufficient natural underground geothermal resources to generate large-scale, ...

As part of its climate adaptation efforts, Grenada can invest in building climate-resilient energy infrastructure, including burying power lines, developing microgrids, and enhancing storage capacities.

On April 30, 2024, GSL Energy installed a 20kWh home wall-mounted lithium iron phosphate (LiFePO4) energy storage system in Grenada. This system offers reliable backup power, ...
