Developed by the Three Gorges Corporation, a wind and solar energy company headquartered in Guazhou County, China, the new facility combines efficiency, innovation and large ...

China's solar thermal plant in Gansu Province uses 30,000 mirrors to generate electricity. The plant's design allows it to operate 24/7, thanks to heat storage in molten salt. This innovative ...

A solar thermal project is under construction in Haixi Mongolian and Tibetan Autonomous Prefecture of northwest China's Qinghai Province. At present, more than 90 percent of heliostats ...

The 100MW molten-salt solar thermal power plant, also called the "super mirror power plant" with its more than 12,000 heliostats, sparkles in the Gobi Desert in Dunhuang, northwest ...

Dunhuang was chosen to be the home of this large-scale solar thermal power station because of its abundant sunlight resources. Meanwhile, the city's booming tourism industry also ...

China has commissioned the west tower of the world's first dual-tower, single-generator solar thermal power plant in Guazhou, northwest China's Gansu Province. More than 20,000 ...

The solar thermal energy storage power station can generate electricity with or without direct sunlight, thanks to the heliostats and the molten salt, while achieving stable all-day power ...

The thermal power station built by the China Three Gorges Corporation, the plant in Guazhou County, uses two towers to feed a single turbine system. Approximately 27,000 mirrors ...
