-----

Two millennia ago, in the great cosmopolitan center of Alexandria, there lived a man named Hero, a scientific experimenter and inventor who developed breakthrough applications for ...

There are 3 inventions of Heron of Alexandria that made him famous. First, Heron invented the world's first wind powered machine. Second, He invented the thermometer. Third, Heron of Alexandria ...

What very few people know, thanks to the omission of important facts from our history books, is that Heron was the first inventor of the steam engine, a steam powered device that was ...

Heron of Alexandria (flourished c. ad 62, Alexandria, Egypt) was a Greek geometer and inventor whose writings preserved for posterity a knowledge of the mathematics and engineering of Babylonia, ...

Heron of Alexandria was one of the finest mathematicians and inventors that the world has ever known. He began to explore the practical uses of mathematics rather than the abstract mathematical laws.

In the book *The Pneumatics of Hero Of Alexandria*, Bennet Woodcroft, Professor of machinery in University College London lists all of Hero's inventions. Below is just a selection of ...

What very few people know, thanks to the omission of important facts from our history books, is that Heron was the first inventor of the steam ...

In experiments that were literally centuries ahead of his time, Hero of Alexandria built the first device powered by steam as well as the first use of wind as a power source for something...
