What is a foldable container?

A foldable container is a specialized container unit made to transport sets or stacks of materials. It is made of thick and robust wire mesh and rollers that allow easy movement. The availability of a range of coloured wire meshes makes these shipping container units a little more cheerful. 11. Half-Height Containers

What is an open-top container?

Open-top containers are perfect for cargo that cannot go through the container door, such as tall machines or heavy products, which can be handled by crane or rolling bridge. They have lashing rings on the upper, lower and corner sides to secure the cargo in place. They come in sizes 20' and 40'. 4. Tunnel Container

When do people use open top containers?

People use them when cargo exceeds the height restrictions of standard containers or requires top-loading, such as machinery, large equipment, and bulk goods. Open top containers serve as a suitable option when cargo cannot be easily loaded through standard container doors.

What is a shipping container used for?

They are used primarily for shipping bulk cargo, like coal, stones, etc., which need easy loading and unloading. They are perfect for the mining industry, and since they have a low centre of gravity, they can handle heavier cargo than tall containers.
