Discover the 5 biggest solar power plants in the world (2025). Learn their capacity, country, and role in shaping global renewable energy.

Total renewable capacity (on-grid and off-grid) Hydropower Renewable hydropower (including mixed plants) Pumped storage (note that this is included in total hydropower capacity, but ...

In renewables, as of 2025, the largest solar farm is Gonghe Talatan Solar Park, China (15,600 MW) and the largest wind farm is Gansu, China (7,965 MW).

We've looked at the 15 biggest solar farms in the world right now, examining capacity, total investment, and the future of solar power worldwide.

Talatan Solar Park (in Gonghe County, Qinghai, China) is the largest solar park in the world with a capacity of 16,000MW as of 2023 and a planning area of 609 km², which is close to the land area of ...

The Bhadla Solar Park is a 2.25GW solar photovoltaic power plant and the largest solar farm in the world, encompassing nearly 14,000 acres of land. The construction of Bhadla Solar Park cost an ...

Explore the 5 Largest solar power plants from around the world. From systems in China, India and the United States.

Located in the Indian state of Rajasthan, the Bhadla Solar Park is the largest solar park in the world. This solar power station covers an area of 21.8 square miles and has a capacity of 2,245 ...
