While Latvia's storage sector grows, developers face regulatory puzzles. The 2022 amendment to the Energy Law streamlined permitting processes, cutting approval timelines from 18 to 9 months.

Rolls-Royce has received an order from the Latvian TSO AST to supply an mtu large-scale battery storage system with an output of 80 MW and a storage capacity of 160 MWh to secure the Latvian ...

Located in the Ventspils region, right next to the Targale wind park, the BESS project took about two years to be realised and will be connected to the Latvian electricity transmission system ...

As the world pivots towards sustainable energy solutions, the demand for efficient and reliable energy storage has never been greater. At the forefront of this revolution is our new battery manufacturing ...

The Huijue Group Off-Grid Solution comprises three main components: photovoltaic systems, energy storage systems, and off-grid systems, enabling energy self-sufficiency.

This report provides an initial insight into various energy storage technologies, continuing with an in-depth techno-economic analysis of the most suitable technologies for Finnish conditions, namely ...

From residential battery walls to 100MW grid-scale installations, Latvian power storage manufacturers deliver solutions that balance innovation with practicality.

As we approach Q4 2025, industry watchers are keeping tabs on Latvia's first gigafactory for battery cells. When operational, it'll slash import costs by 60% and create 800+ skilled jobs.
