The world's longest wind turbine blade, at 88.4 meters, has successfully completed its first journey - perhaps as the largest cargo ever transported on danish roads.

Wind energy has undergone a massive transformation, represented by the colossal blades propelling turbines into the future of renewable power. From modest beginnings with blades a ...

Did you know that the longest wind turbine blades now measure an astonishing 115.5 meters, nearly as tall as the Statue of Liberty? This impressive dimension is not just a feat of ...

You might be surprised to learn that the longest wind turbine blade in the world measures an incredible 107 meters. This impressive length boosts energy efficiency, allowing ...

Today, blades can be 351 feet, longer than the height of the Statue of Liberty, and produce 15,000 kW of power. Modern blades are made from carbon-fiber and can withstand more stress due ...

Currently the longest wind turbine blade is 88.4 metres, produced for an 8 MW offshore turbine. Photo: LM Wind Power, 2017.

Sany Renewable Energy, a Chinese wind turbine manufacturer, has built the world's longest onshore wind turbine blade, the SY1310A, which is 430 feet (131 meters) long.

On February 16, 2020, Siemens Gamesa officially released its 108 meter long blade B108 through its LinkedIn account. In fact, the design size of this blade has been proposed for a long time, but this is ...
