What should I include in my PV project proposal?

If you have qualified PV design personnel and an experienced qualified installation team be sure to include their individual profiles and CVs in your proposal. Take them time to identify their experience that closely relates to the project you are looking to secure, and detail how their experience is similar.

What should I include in my PV tender response?

It is important to focus on your in-house expertise in your tender response. If you have qualified PV design personnel and an experienced qualified installation team be sure to include their individual profiles and CVs in your proposal.

How do I write a proposal for a panel or inverter?

Where you are proposing to use a certain type of panel or inverter, take the time to detail the benefits of that inverter. You need to go beyond simply attaching the specifications provided by the supplier and instead, clearly summarise and discuss in your proposal the specific advantages.

Why do you need an infographic for a bid?

This will help the non-technical personnel reviewing the proposal to understand what you are putting forward and will also provide a good summary for your points of difference. Infographics are an excellent way to better present your bid, summarize what you are proposing and convince the reader that you are the right contractor.

This article will walk you through each stage of this journey, so that by the end you'll know how to write executive summaries that give your bid the best possible chance of winning.
